

Table 1: **Effect of Elite College Education on Job Callback**

	callback
EliteSchoolCandidate	.14*** (.032)
Observations	864
R^2	0.021

Notes: This table contains regressions predicting whether the fictitious candidate's job application was called back (1 or 0) as a function of whether subjects had an elite college education (1 or 0). Standard OLS standard errors are reported.

On average, candidates with elite college education appear to be 14 percentage points more likely to receive a callback from their job applications.
